

ROM

input t

A block diagram of a ROM system. A light blue rectangular block with a black border is centered. Inside the block is the differential equation $\frac{d}{dt} q = Q(q, t)$. An arrow labeled "input t " enters the block from the left, and an arrow labeled "output \tilde{f} " exits the block to the right.

$$\frac{d}{dt} q = Q(q, t)$$

output \tilde{f}
