

FOM

input t

A block diagram representing the Forward Operator Method (FOM). A light blue rectangular box with a black border is the central element. Inside the box is the differential equation $\frac{d}{dt}f = Q(f, t)$. An arrow enters the box from the left, labeled "input t ". An arrow exits the box to the right, labeled "output f ".

$$\frac{d}{dt}f = Q(f, t)$$

output f
