

FOM

input t

A block diagram representing the Forward Operator Method (FOM). A light blue rectangular box with a black border is the central element. Inside the box is the differential equation $\frac{d}{dt}f = Q(f, t)$. An arrow labeled "input t " enters the box from the left, and an arrow labeled "output f " exits the box to the right.

$$\frac{d}{dt}f = Q(f, t)$$

output f
